Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This office action is in response to the application filed October 28, 2003.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Tsung-Wen (U.S. 6,225,139).

Tsung-Wen (Fig 1, 7, 8) providing an optoelectronic transducer ("LED") mounted on a support (12) with inner flat conductors (11) and outer flat conductors; embedding the transducer and the inner flat conductors in a plastic housing (1); and milling the plastic housing (CLM 1 step 24 of Tsung-Wen) to form a radiation-optical functional surface for the plastic housing. coupling partner from a material of plastic housing; (cl. 2) and the radiation-optical functional surface (i.e. concave portion of encapsulant that affects light; shown in Fig 8) in alignment (i.e. lens aligned with transducer) with transducer; (cl. 3) and die casting (interpreted to mean encapsulating) in guiding stub ("guide hole"; claim 1 of Tsung-Wen).

Allowable Subject Matter

Claims 4-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose a guiding stub in a mold with the stub being separated from a plastic housing by a separating wall including all the limitations of the independent claim.

While the prior art for example in Kikukawa (Fig. 3) utilizes a milling apparatus and a guiding stub (14; i.e. guides component), the stump is separate from a mold and fails to show or make obvious casting a plastic housing with a guiding stump in a mold including all the limitations of the independent claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James M. Mitchell whose telephone number is (571) 272-1931. The examiner can normally be reached on M-F 8:00-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Whitehead Jr. can be reached on (571) 272-1702. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
